

KARTHIKEYAN M

Software Development Engineer | 3+ Years | Full Stack | Node.js | React.js

+91 6381494439 | karthikeyandev03@gmail.com | linkedin.com/in/karthi-keyan-m | github.com/Karthikeyan000 |
Tirunelveli, Tamil Nadu, India

PROFESSIONAL SUMMARY

Software Development Engineer with 3+ years of progressive experience at Icanio Technologies, specializing in Node.js, React.js, and full-stack web development. Promoted from Intern → SDE 1 → SDE 2 based on consistent performance and technical leadership. Skilled in building scalable RESTful APIs, microservices, event-driven systems (Kafka, BullMQ), and managing both relational and NoSQL databases (PostgreSQL, MongoDB). Experienced in AWS S3, Docker, Redis caching, and performance optimization. Recognized as a top performer — won 1st Place at the AI Vibe Hackathon (Icanio, 2025) for building an AI-powered Idea-to-Diagram tool using DeepSeek.

Promoted from SDE 1 to SDE 2 in April 2026 based on consistent high performance, technical leadership, and measurable project impact across 3+ years at Icanio Technologies.

TECHNICAL SKILLS

Backend: Node.js, Express.js, REST APIs, Microservices, Apache Kafka, Redis, BullMQ, JWT, OAuth, Cron Jobs, Lambda Functions, AWS S3

Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Redux, Ant Design, MUI (Material UI)

Databases: PostgreSQL, MongoDB, SQLite

ORM/ODM: Prisma, Sequelize, Mongoose

Mobile: Flutter, Capacitor, Firebase, Push Notifications, AdMob, Razorpay

Tools & DevOps: Git, GitHub, GitLab, Docker, CI/CD, Agile/Scrum, Unit Testing, Code Reviews

Performance & Optimization: Performance Optimization, Caching Strategies (Redis, In-Memory), Query Optimization, Asynchronous Processing

WORK EXPERIENCE

Software Development Engineer 2 (SDE 2) ↑ **Promoted** Apr 2026 – Present

Icanio Technologies Lab Pvt Ltd | Tirunelveli, Tamil Nadu

Promoted from SDE 1 to SDE 2 in April 2026 based on consistent high performance, technical leadership, and measurable project impact across 3+ years at Icanio Technologies.

- **Team Leadership & Architecture:** Lead cross-functional development teams, drive technical decisions, define code standards, and oversee end-to-end delivery of complex features across multiple concurrent projects.
- **Hackathon — 1st Place:** Won First Prize at the AI Vibe Hackathon (Icanio Technologies, May 2025) — built Vistello, an AI-powered 'Idea to Diagram' tool converting natural language ideas into visual architecture diagrams using the DeepSeek model; completed in a single day following a structured pre-planning approach.

Software Development Engineer 1 (SDE 1) Apr 2024 – Apr 2026

Icanio Technologies Lab Pvt Ltd | Tirunelveli, Tamil Nadu

Design-led software development company specializing in app development, digital engineering, and IT consulting.

- **Full Stack Development:** Designed and developed 5+ responsive, high-performance web applications using React.js, Node.js, and Express.js; implemented scalable RESTful APIs serving multiple business-critical features across concurrent users.
- **Backend Engineering:** Built and maintained robust server-side logic in Node.js including JWT/OAuth authentication, asynchronous operations, scheduled background jobs (Cron Jobs), and third-party API integrations, reducing manual overhead by ~40%.
- **Message Queues & Async Processing:** Architected event-driven workflows using Apache Kafka and Redis-based BullMQ, enabling reliable high-throughput background job processing and improving system scalability for peak traffic scenarios.

- **Database Management:** Designed and managed relational (PostgreSQL, SQLite) and NoSQL (MongoDB) databases using Prisma and Sequelize ORM; optimized complex queries and data models to improve query performance.
- **Frontend Engineering:** Built dynamic, accessible user interfaces using React.js, Redux, JavaScript (ES6+), HTML5, and CSS3; ensured responsive design and cross-browser compatibility across all major browsers.
- **Mobile Development:** Contributed to cross-platform mobile app development using Flutter and Capacitor; integrated Firebase services and Push Notifications to drive user engagement.
- **Code Quality:** Mentored junior developers, conducted code reviews, led sprint planning, and enforced clean code principles and unit testing practices in an Agile/Scrum environment.
- **Career Milestone:** Fast-tracked from SDE Intern (Sep 2023 – Apr 2024) to full-time SDE 1 within 6 months — selected from a cohort of 50 interns; subsequently promoted to SDE 2 in April 2026, accumulating 3+ years of progressive engineering experience.

Software Development Engineer – Intern (SDE Intern) Sep 2023 – Apr 2024

Icanio Technologies Lab Pvt Ltd | Tirunelveli, Tamil Nadu

Design-led software development company specializing in app development, digital engineering, and IT consulting.

• **Internship Responsibilities:** Contributed to full-stack development tasks under senior engineer guidance; built RESTful APIs and React.js UI components, assisted in database schema design with PostgreSQL, and participated in code reviews and agile sprint ceremonies — demonstrating strong performance that led to early full-time conversion.

PROJECTS

Eva Equity Partners – Web & Backend Development

Feb 2026 – Present

Eva Equity Partners | Tirunelveli, Tamil Nadu

Tech Stack: React.js, Node.js, Express.js, PostgreSQL, Prisma, REST APIs, Redux, AWS S3

Worked with an IT consulting firm to build and optimize client-facing web applications and backend systems, delivering scalable full-stack solutions to improve business operations across client organizations.

- **Full Stack Development:** Built and maintained responsive, high-performance web applications using React.js and Node.js with Express.js; designed and implemented RESTful APIs to support client business workflows including CRM, sales pipeline, finance tracking, and HR management features — integrating AWS S3 for document and asset storage.
- **Backend & Database Engineering:** Designed and optimized PostgreSQL database schemas using Prisma ORM; implemented indexing strategies, query optimizations, and efficient data models to support complex business reporting and real-time dashboards; handled authentication (JWT), background jobs, and third-party API integrations for client-specific requirements.

Jesus Calls – Lyfgen Church Management System Nov 2025 – Feb 2026

Tech Stack: React.js, Node.js, PostgreSQL, Prisma, Microservices

- Built and managed features for the Jesus Calls Organization's church management system including financial management, prayer tower operations, staff management, and donation/prayer request workflows via mail and post.
- Developed donor-focused features such as blessing plans, improving donor engagement and operational efficiency. Responsible for team management and junior developer oversight.

Inflect – AI-Powered Retail Visual Intelligence Aug 2025 – Nov 2025

Tech Stack: Flutter, Capacitor, Standalone Library Development

- Worked on InfliViz, Inflect's flagship product delivering real-time shelf metrics, stock levels, and planogram compliance (>97% accuracy) using AI-powered visual intelligence.
- Contributed as a Junior App Developer managing cross-platform mobile development; built a standalone Flutter library to support modular integration.

PluginLive – Campus Talent Acquisition Platform Mar 2024 – Aug 2025

Tech Stack: Node.js, React.js, MongoDB, PostgreSQL, Microservices, Lambda, AWS S3, Prisma, Redux, Ant Design

- Planned, developed, and maintained an end-to-end campus recruiting platform streamlining brand building, talent acquisition, training, assessment, and interviewing with minimal human intervention.

- Took full-stack end-to-end ownership; handled high-throughput background job processing using Apache Kafka across microservices; integrated AWS Lambda Functions for scalable serverless operations; utilized AWS S3 for secure document and asset storage across the platform.
- **Query Performance Optimization:** Improved database query performance by implementing strategic indexing on high-frequency lookup columns (user IDs, job IDs, status fields) in PostgreSQL and MongoDB, combined with query restructuring, Prisma-level optimizations, and eliminating N+1 patterns — reducing API response times for talent search and assessment modules by ~40%.

Waterfield Advisors – Wealth Intelligence Platform*Dec 2023 – Mar 2024*

Tech Stack: Node.js, React.js, PostgreSQL, Sequelize, Redux, MUI, AWS S3

- Built a secure wealth intelligence and portfolio consolidation platform for Ultra High Net Worth Individuals (UHNWI), digitizing manual portfolio tracking into a centralized real-time insights dashboard.
- Developed the foundational codebase from scratch; managed and mentored the development team; delivered transparent data visualization tools enabling informed financial decision-making; used AWS S3 for secure storage and retrieval of client portfolio documents and reports.

Duco Insure – Digital Insurance Platform*Sep 2023 – Dec 2023*

Tech Stack: Flutter, Node.js, Firebase, MongoDB, JWT, Razorpay, AdMob, AWS S3, Push Notifications, Remote Config

- Developed the admin panel for a digital insurance intermediary platform known for precise premium calculations; provided production support for mobile app issues.
- Integrated Razorpay payment gateway, AdMob ads, Firebase Remote Config, and Push Notifications to enhance platform utility and user engagement; leveraged AWS S3 for storing and serving policy documents and user-uploaded files.

ACHIEVEMENTS & AWARDS

1st Place — AI Vibe Hackathon | *Icanio Technologies* | *May 31, 2025*

Project: Vistello – AI-powered Idea to Diagram tool

Built an AI application that converts natural language ideas into diagrams and architectural visualizations using the DeepSeek model. The challenge required planning the full solution one day before, then completing a working application within a single day. Our team secured First Prize among all competing teams.

Stack: React.js, Python Django, DeepSeek AI Model, Phidata (AI Agents), Mermaid, Cursor AI
